

V I S U A L I N D E X

Standard Type

NNN

The standard type combines the best performance and user-friendliness in its class. The selectable arm length (250 mm to 800 mm) provides the flexibility to accommodate a wide range of applications.

P11

IX-NNN2515	P11
IX-NNN3515	P12
IX-NNN5020 (5030)	P13
IX-NNN6020 (6030)	P14
IX-NNN7020 (7040)	P15
IX-NNN8020 (8040)	P16

High-Speed Type

NSN

The high-speed type offers enhanced performance in high-speed operation by combining a high-output motor with the standard body. It helps reduce cycle times.

P17

IX-NSN5016	P17
IX-NSN6016	P18

Dustproof/ Splash-proof Type

NNW

The dustproof/splash-proof type adopts a protective structure conforming to IP65. This robot can be used in environments subject to powder dust or water splashes.

P19

IX-NNW2515	P19
IX-NNW3515	P20
IX-NNW5020 (5030)	P21
IX-NNW6020 (6030)	P22
IX-NNW7020(7040)	P23
IX-NNW8020(8040)	P24

Wall-Mount Type

TNN

This robot is mounted on a wall for operation. The space below the robot can be utilized effectively, so you will have more freedom in designing your equipment.

P25

IX-TNN3015	P25
IX-TNN3515	P26

**Wall-Mount
Inverse Type****UNN**

This robot is the same as the wall-mounting type (TNN), but it is installed upside down. UNN is ideal for applications where the robot must handle loads located above it.

**P25**

IX-UNN3015	P25
IX-UNN3515	P26

Ceiling Mount Type**HNN**

This robot is mounted on a ceiling for operation. The space below the robot can be utilized effectively, so you will have more freedom in designing your equipment.

**P27**

IX-HNN5020	P27
IX-HNN6020	P28
IX-HNN7020(7040)	P29
IX-HNN8020(8040)	P30

**Ceiling Mount Inverse Type
(Tabletop Mount)****INN**

This robot is the same as the ceiling mount type (HNN), but it is installed upside down. INN is ideal for applications where the robot must handle loads located above it.

**P27**

IX-INN5020	P27
IX-INN6020	P28
IX-INN7020(7040)	P29
IX-INN8020(8040)	P30

Clean Room Type**NNC**

This robot generates minimal particles and is ideal for operation in a clean room environment. The air inside the robot can be vacuumed if conformance to cleanliness class 10 is required.

**P31**

IX-NNC2515	P31
IX-NNC3515	P32
IX-NNC5020 (5030)	P33
IX-NNC6020 (6030)	P34
IX-NNC7020 (7040)	P35
IX-NNC8020 (8040)	P36

New Horizontal Articulated Robot IX Series Achieves Class Top Performance and High Cost Performance

The IX Series achieved the best-in-class specification in every aspect—from high-speed performance and load capacity to positioning repeatability—after reviewing and redesigning all the components of the conventional IH Series robots. The IX Series also outdistances its rivals in user-friendliness, lineup and cost performance.

High-Performance

1. Highest Speed, Load Capacity and Accuracy in Its Class

Standard cycle time: 0.44 sec (*1)
 Positioning repeatability: ± 0.01 mm/ $\pm 0.005^\circ$ (*2)
 Maximum load capacity: 20 kg (*3)

*1 The standard cycle time refers to the time required to cycle back and forth over a vertical distance of 25 mm and horizontal distance of 300 mm (rough positioning).

*2 If the arm length is 700/800, the repeatability becomes ± 0.015 mm/ $\pm 0.005^\circ$.

*3 Based on an arm length of 700/800.

2. Compact and Rigid

The IX Series is significantly smaller compared with the conventional IH Series robots.

The IX Series achieved enhanced rigidity in a lightweight body by comprising arm 1 using aluminum extruded material. This helped reduce the inertial load.

3. Markedly Improved Tracing Accuracy and Interpolation Function

The IX Series offers a markedly improved tracing accuracy as a result of higher controller processing speed and rigid robot construction.

The robot can also perform three-dimensional arc/pass motions to allow for easy, accurate dispensing operation.

Path movement that consists of many points can be implemented with a single program line.

Command	Operand 1	Operand 2
PATH	P1	P20

Easy

4. Greater Ease of Use

An easy-to-use D-sub/25-pin connector is provided on top of the robot for user wiring. The user can also connect two $\phi 4$ tubes and two $\phi 6$ tubes to meet various tubing needs.

The brake-release switch on the robot lets you release the brake even when the controller power is off (*1). The alarm indicator alerts you on each error generated in the robot (*2).

*1 24 VDC power must be supplied regardless of whether or not the brake-release switch is used.

*2 The alarm indicator must be wired by the user.

5. Easy Programming

The IX Series adopts Super SEL Language, a well-known command language used by IAI Cartesian robots. With Super SEL, complex operations can be programmed easily. You can create desired programs right away without much knowledge of robot language.

Plus α

6. Z-Axis Push Motion Function

The Z-axis (vertical axis) can be pressed against the load, so you can use the robot to press-fit loads or control push force.

7. Simple Interference Check Zone Function

A maximum of 10 interference check zones can be set inside the robot's work envelope. When the load enters a check zone, the robot will inform you with a signal output. Use this function to conduct test operation at low speed.

* The load must remain inside a zone for at least 5 msec to ensure accurate detection.

8. Complete Absolute Operation

All models adopt a 17-bit serial absolute encoder, so accurate positioning can be performed without homing each time.

If a need arises, an absolute reset can be performed easily and accurately using a dedicated jig (refer to "Robot Options" on P. 8).

Variation

9. Widest Variations in the Industry

The IX Series provides the following six variations to choose from:

- Standard type
- High-speed type
- Clean room type
- Dustproof/splash-proof type
- Wall mount/inverse type
- Ceiling mount/inverse type

Select one that best suits your intended application.

Specifications

Type	Arm length (mm), maximum composite speed (mm/s)	Standard cycle time (sec)						Load capacity (*1)		Vertical axis stroke (mm)		Model	Page

							7121 mm/s	0.52	5	20	200	400	IX-NNC8020(8040)	P36

(*1) The rated load capacity indicates the maximum load that can be carried at the maximum operating speed. The maximum load capacity indicates the maximum load that can be carried at a reduced acceleration rate.

IX Series Points to Note

<SCARA Type XI-NNN/NSN/NNW/TNN/UNN/HNN/INN/NNC>

(Note 1)
Positioning repeatability

“Positioning repeatability” refers to the positioning accuracy of repeated movements to a pre-stored position. This is not the same as “absolute positioning accuracy.”
The specified positioning repeatability is measured in an ambient temperature of 20°C constant.

(Note 2)
Maximum operating speed

The specified maximum operating speed represents the speed of PTP command operation. High-speed movement will be limited in CP command operation (interpolation operation).

(Note 3)
Standard cycle time

“Standard cycle time” refers to the time required to cycle back and forth over a vertical distance of 25 mm and horizontal distance of 300 mm (rough positioning).

<Caution>

The specified cycle time is based on a 2-kg load (5-kg load if the arm length is 700/800) and the maximum operating speed.

The robot cannot operate continuously at the maximum speed.

**(Note 4)**
Axis 3 push force

“Axis 3 push force” represents the push force applied by the tip of the vertical axis. The value under “Push action” indicates the maximum push force to be applied when a programmed push command is executed. The value under “Maximum thrust” indicates the maximum thrust in a normal positioning operation. When a push action is performed during a normal positioning operation, a force corresponding to three times the maximum thrust may apply momentarily. When performing a push action, be sure to use a programmed push command.

(Note 5)
Axis 4 allowable inertial moment

“Axis 4 allowable inertial moment” indicates the allowable inertial moment of axis 4 (rotating axis) of the SCARA robot as calculated at the center of rotation.
The offset from the center of rotation of axis 4 to the tool gravity center must be within 40 mm. If the tool gravity center is further away from the center of axis 4, the speed and/or acceleration rate must be reduced as necessary.

(Note 6)
Alarm indicator

The alarm indicator is located on top of arm 2 of the SCARA robot.
The alarm indicator can be wired in such a way that it will illuminate in a certain condition such as when the controller generates an error. To use the alarm indicator, the user must provide a circuit that responds to the controller's I/O output signal to supply 24 VDC to the applicable LED terminal in the user wiring.

(Note 7)
Brake-release switch

The brake-release switch is also located on top of the robot's arm 2 near the alarm indicator.
To release the brake, 24 VDC power must be supplied regardless of whether or not the brake-release switch is used. (Supply 24 VDC from a dedicated power supply separate from the 24 VDC power used for driving the I/Os.)

(Note 8)
Cable length

The motor and encoder cables of the SCARA robot are directly connected to the robot. The IX Series doesn't use a cable joint, so changing the cable length on the delivered robot will be difficult.
Select either 5 m (code 5L) or 10 m (10L) as the desired cable length when ordering.

(Note 9)
Protection grade (protective structure)

This grade indicates the level of actuator protection against water and solid foreign matters.
IP65  The actuator is protected against solid foreign matters to a degree where dust will not enter the actuator.
The actuator is protected against water intrusion to a degree where the actuator will not be negatively affected by water injected at a given angle.

(Note 10)
Air purge pressure

To use the dustproof/splash-proof type in an IP65 environment, air must be supplied from the air inlet located at side (or back) of the robot base (to perform air purge). The air purge pressure must conform to the common specification applicable to all robot types. (Supplied air must be clean, dry air of atmospheric pressure with a dew-point temperature of -20°C or below.)

(Note 11)
Internal vacuuming

To use the clean type in an environment of cleanliness class 10, the air inside the robot must be vacuumed from the air suction outlet located at side (or back) of the robot base. The suction rate must conform to the common specification applicable to all robot types.

IX Series System Configuration Drawing

Robot Accessories

- Caution labels
- Positioning seals
- Eyebolts
- Service connectors

Controller Accessory

- PIO flat cable
Model CB-X-PIO

Unlike other models, the SCARA robot is ordered as a combination of robot and controller.

Items ① through ③ specify the SCARA robot.

Items ④ through ⑧ specify the controller.

① Series

Indicate the name of each series.

③ Cable length

Indicate the length of the cable connecting the robot and the controller.

Select either 5L (5 m) or 10L (10 m).

Unlike a single-axis robot, the IX Series doesn't adopt a joint cable.

The cable comes out directly from the robot.

⑤ Standard PIO specification

Indicate the specification of the controller's standard I/O slot.

* N3 and P3 are dedicated options for the JX controller and cannot be specified for the KX controller.

N1 : [NPN standard PIO] An NPN PIO board with 32 input points and 16 output points is installed (standard).

N3 : [NPN multipoint PIO] An NPN multipoint PIO board with 48 input points and 48 output points is installed (dedicated option for the JX controller).

P1 : [PNP standard PIO] A PNP PIO board with 32 input points and 16 output points is installed.

P3 : [PNP multipoint PIO] A PNP multipoint PIO board with 48 input points and 48 output points is installed (dedicated option for the JX controller).

DV : [DeviceNet connection specification] A DeviceNet connection board with a maximum of 256 input points and 256 output points is installed.

CC : [CC-Link connection specification] A CC-Link connection board with a maximum of 256 input points and 256 output points is installed.

PR : [ProfiBus connection specification] A ProfiBus connection board with a maximum of 256 input points and 256 output points is installed.

ET : [Ethernet connection specification] An Ethernet connection board offering data communication capability is installed.

⑥ Expansion I/O specification

Indicate the specification of the controller's expansion slot.

An expansion board can be installed in slot 1, 2 or 3 of the KX controller, or in slot 1 of the JX controller.

Use a three-digit code (EEE) to specify the slot type. In the case of the JX controller having only one expansion slot, specify the slot using the first digit and leave "E" in the remaining two digits (□EE).

* C, N3, P3, SA, SB and SC are dedicated options for the KX controller and cannot be specified for the JX controller.

E : [Unused] Expansion board is not used.

C : [CC-Link connection specification] A CC-Link connection board with 16 input points and 16 output points is installed (dedicated option for the KX controller).

N1 : [NPN expansion PIO] An NPN PIO board with 32 input points and 16 output points is installed.

N2 : [NPN expansion PIO] An NPN PIO board with 16 input points and 32 output points is installed.

N3 : [NPN multipoint PIO] An NPN multipoint PIO board with 48 input points and 48 output points is installed (dedicated option for the KX controller).

P1 : [PNP expansion PIO] A PNP PIO board with 32 input points and 16 output points is installed.

P2 : [PNP expansion PIO] A PNP PIO board with 16 input points and 32 output points is installed.

P3 : [PNP expansion PIO] A PNP PIO board with 48 input points and 48 output points is installed (dedicated option for the KX controller).

SA : [Expansion SIO type A] An RS232C communication board is installed (dedicated option for the KX controller).

SB : [Expansion SIO type B] An RS422 communication board is installed (dedicated option for the KX controller).

SC : [Expansion SIO type C] An RS485 communication board is installed (dedicated option for the KX controller).

⑦ I/O flat cable length

Indicate the length of the cable used for transmitting signals between the controller and the PLC.

One cable is supplied with one I/O board installed in the standard slot or each expansion slot.

2: 2m

3: 3m

5: 5m

0: None (Specify this number if you have installed a network board instead of a standard I/O board.)

② Model

Indicate the model type (standard, high-speed, dustproof/splash-proof, wall-mount or ceiling-mount), arm length and Z-axis length.

NNN Standard type UNN Wall-mount type (inverse type)

NSN High-speed type HNN Ceiling-mount type

NNW Dustproof/splash-proof type INN Ceiling-mount type (inverse type)

TNN Wall-mount type

④ Controller type

Select a dedicated controller (KX or JX type) for the SCARA robot.

* Only the KX type may be specified if the arm length is 500 or longer.

⑧ Power-supply voltage

Indicate the main power-supply voltage for the controller.

The power-supply voltage is fixed to single-phase 200 VAC for a SCARA controller.

IX-NNN2515

Small SCARA Robot Standard Type: Arm Length 250mm, Vertical (Z) Axis 150mm

	Axis 4 Rotating axis	-	50	±360°	±0.005	360°/s							

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P. 10).

Common Specifications

Encode type	Absolute	Ambient temperature/humidity	Temperature: 0-40°C, humidity: 20-85%RH or below (non-condensing)
User wiring	15-conductor AWG26 D-sub/15-pin connector with shield (socket)	Robot weight	17.1kg
User tubing	Air tube (O.D. ø4, I.D. ø2.5) x 3 (Normal working pressure 0.8MPa)	Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)		
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)		

Dimensions

*1: The external force applied to each spacer must not exceed 30 N in the axial direction or 2 N·m in the rotating direction.
 *2: To use the LED, the user must provide a circuit that takes signals from the controller's I/O output and supplies 24 VDC to the applicable LED terminal in the user connector.

- Cables/tubes
- Motor/encoder cable 5m/10m
 - Brake power cable 5m/10m
 - User cable 5m/10m
 - Air tube (3 pcs) 0.15m

Applicable Controller Specifications

Applicable controller	Features	Maximum I/O points (inputs/outputs)	Serial communication unit	Power-supply voltage	Page
XSEL-KX	General-purpose type offering excellent expandability	176/160 points	Can be installed.	AC200V	P37
XSEL-JX	Compact, space-saving type	80/64 points	Cannot be installed.		P37

Caution Refer to P. 6 for the explanations of (Note 1) to (Note 8).

IX-NNN3515

Small SCARA Robot Standard Type: Arm Length 350mm, Vertical (Z) Axis 150mm

Type / Standard type Arm length / 350mm Load capacity / 1kg rated/3kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage
 (Example) IX - NNN3515 - 5L - KX - N1 - EEE - 2 - 2

* Refer to P. 10 for details on the model items.

* The above model code represents a combination of robot and controller.

Model/Specifications

Model	Axis configuration	Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load	
								Rated	Maximum	Push action (Note 4)	Maximum thrust (Note 4)	Allowable inertial moment (kg·m ²) (Note 5)	Allowable torque (N·m)
IX-NNN3515-5L-□-□-□-□-2	Axis 1 Arm 1	225	200	±120°	±0.010	3979mm/s (Composite speed)	0.53	1	3	65.3	90.9	0.015	1.9
	Axis 2 Arm 2	125	100	±135°		1106mm/s							
	Axis 3 Vertical axis	—	100	150mm	±0.010	1600'/s							
	Axis 4 Rotating axis	—	50	±360°	±0.005								

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P. 10).

Common Specifications

Encode type	Absolute	Ambient temperature/humidity	Temperature: 0-40°C, humidity: 20-85%RH or below (non-condensing)
User wiring	15-conductor AWG26 D-sub/15-pin connector with shield (socket)	Robot weight	18.2kg
User tubing	Air tube (O.D. ø4, I.D. ø2.5) x 3 (Normal working pressure 0.8MPa)	Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)		
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)		

Dimensions

*1: The external force applied to each spacer must not exceed 30 N in the axial direction or 2 N·m in the rotating direction.
 *2: To use the LED, the user must provide a circuit that takes signals from the controller's I/O output and supplies 24 VDC to the applicable LED terminal in the user connector.

- Cables/tubes
- Motor/encoder cable 5m/10m
 - Brake power cable 5m/10m
 - User cable 5m/10m
 - Air tube (3 pcs) 0.15m

Applicable Controller Specifications

Applicable controller	Features	Maximum I/O points (inputs/outputs)	Serial communication unit	Power-supply voltage	Page
XSEL-KX	General-purpose type offering excellent expandability	176/160 points	Can be installed.	AC200V	P37
XSEL-JX	Compact, space-saving type	80/64 points	Cannot be installed.		P37

Refer to P. 6 for the explanations of (Note 1) to (Note 8).

IX-NNN50

IX Medium SCARA Robot Standard Type:
Arm Length 500mm, Vertical (Z) Axis 200mm (300mm)

Type / Standard type Arm length / 500mm Load capacity / 2kg rated/10kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage
(Example) IX - NNN5020 - 5L - KX - N1 - EEE - 2 - 2

* Refer to P.10 for details on the model items.

* The above model code represents a combination of robot and controller.

Model/Specifications

Model	Axis configuration	Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load	
								Rated	Maximum	Push action (Note 4)	Maximum thrust (Note 4)	Allowable inertial moment (kg·m ²) (Note 5)	Allowable torque (N·m)
IX-NNN5020-5L-KX-□-□-□-2 [IX-NNN5030-5L-KX-□-□-□-2]	Axis 1 Arm 1	250	400	±120°	±0.010	6283mm/s (Composite speed)	0.44	2	10	108	152	0.06	3.3
	Axis 2 Arm 2	250	200	±145°									
	Axis 3 Vertical axis	—	200	200mm [300mm]	±0.010	1393mm/s							
	Axis 4 Rotating axis	—	100	±360°	±0.005	1200°/s							

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P.10).

Common Specifications

Encode type	Absolute	Ambient temperature/humidity	Temperature: 0-40 °C, humidity: 20-85%RH or below (non-condensing)
User wiring	25-conductor AWG26 D-sub/25-pin connector with shield (socket)	Robot weight	29.5kg
User tubing	Air tube (O.D. ø6, I.D. ø4) x 2 (Normal working pressure 0.8MPa) Air tube (O.D. ø4, I.D. ø2.5) x 2 (Normal working pressure 0.8MPa)	Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)		
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)		

Dimensions

Applicable Controller Specifications

XSEL-KX	General-purpose type offering excellent expandability	176/160 points	Can be installed.	AC200V	P37

Refer to P. 6 for the explanations of (Note 1) to (Note 8).

IX-NNW2515

Small SCARA Robot Dustproof/splash-proof type:
Arm Length 250mm, Vertical (Z) Axis 150mm

Type Dustproof/splash-proof type Arm length 250mm Load capacity 1kg rated/3kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage
(Example) IX - NNW2515 - 5L - KX - N1 - EEE - 2 - 2

* Refer to P. 10 for details on the model items.

* The above model code represents a combination of robot and controller.

Model/Specifications

Model	Axis configuration	Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load	
								Rated	Maximum	Push action (Note 4)	Maximum thrust (Note 4)	Allowable inertial moment (kg·m ²) (Note 5)	Allowable torque (N·m)
IX-NNW2515-5L-□-□-□-□-2	Axis 1 Arm 1	125	200	±120°	±0.010	3142mm/s (Composite speed)	0.51	1	3	65.3	90.9	0.015	1.9
	Axis 2 Arm 2	125	100	±120°									
	Axis 3 Vertical axis	—	100	150mm	±0.010	1106mm/s							
	Axis 4 Rotating axis	—	50	±360°	±0.005	1600°/s							

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P. 10).

Common Specifications

Encode type	Absolute	Ambient temperature/humidity	Temperature: 0-40°C, humidity: 20-85%RH or below (non-condensing)
User wiring	15-conductor AWG26 waterproof connector with shield	Robot weight	21kg
User tubing	Air tube (O.D. ø4, I.D. ø2.5) x 3 (Normal working pressure 0.8MPa)	Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)	Protection grade (Note 9)	IP65 or equivalent
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)	Air purge pressure (Note 10)	0.3MPa or above (0.6MPa maximum) (Clean, dry air)

Dimensions

*1: The external force applied to each spacer must not exceed 30 N in the axial direction or 2 N·m in the rotating direction.
*2: To use the LED, the user must provide a circuit that takes signals from the controller's I/O output and supplies 24 VDC to the applicable LED terminal in the user connector.

Applicable Controller Specifications

Applicable controller	Features	Maximum I/O points (inputs/outputs)	Serial communication unit	Power-supply voltage	Page
XSEL-KX	General-purpose type offering excellent expandability	176/160 points	Can be installed.	AC200V	P37
XSEL-JX	Compact, space-saving type	80/64 points	Cannot be installed.		P37

Refer to P. 6 for the explanations of (Note 1) to (Note 8).

IX-NNW3515

Small SCARA Robot Dustproof/splash-proof type:
Arm Length 350mm, Vertical (Z) Axis 150mm

Type Dustproof/splash-proof type Arm length 350mm Load capacity 1kg rated/3kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage
(Example) IX-NNW3515-5L-KX-N1-EEE-2-2

* Refer to P. 10 for details on the model items.

* The above model code represents a combination of robot and controller.

Model/Specifications

Model	Axis configuration		Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P. 10).

Common Specifications

Encode type	Absolute	Ambient temperature/humidity	Temperature: 0-40°C, humidity: 20-85%RH or below (non-condensing)
User wiring	15-conductor AWG26 waterproof connector with shield	Robot weight	22kg
User tubing	Air tube (O.D. ø4, I.D. ø2.5) x 3 (Normal working pressure 0.8MPa)	Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)	Protection grade (Note 9)	IP65 or equivalent
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)	Air purge pressure (Note 10)	0.3MPa or above (0.6MPa maximum) (Clean, dry air)

Dimensions

*1: The external force applied to each spacer must not exceed 30 N in the axial direction or 2 N·m in the rotating direction.
*2: To use the LED, the user must provide a circuit that takes signals from the controller's I/O output and supplies 24 VDC to the applicable LED terminal in the user connector.

Applicable Controller Specifications

Applicable controller	Features	Maximum I/O points (inputs/outputs)	Serial communication unit	Power-supply voltage	Page
XSEL-KX	General-purpose type offering excellent expandability	176/160 points	Can be installed.	AC200V	P37
XSEL-JX	Compact, space-saving type	80/64 points	Cannot be installed.		P37

Refer to P. 6 for the explanations of (Note 1) to (Note 8).

- Cables/tubes
- Motor/encoder cable 5m/10m
- Brake power cable 5m/10m
- User cable 5m/10m
- Air tube (3 pcs) 0.15m

IX-NNW50

IX Medium SCARA Robot Dustproof/splash-proof type:
Arm Length 500mm, Vertical (Z) Axis 200mm (300mm)

Type Dustproof/splash-proof type Arm length 500mm Load capacity 2kg rated/10kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage
(Example) IX - NNW5020 - 5L - KX - N1 - EEE - 2 - 2

* Refer to P. 10 for details on the model items.

* The above model code represents a combination of robot and controller.

Model/Specifications

Model	Axis configuration	Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load	
								Rated	Maximum	Push action (Note 4)	Maximum thrust (Note 4)	Allowable inertial moment (kg·m ²) (Note 5)	Allowable torque (N·m)
IX-NNW5020-5L-KX-□-□-□-2 [IX-NNW5030-5L-KX-□-□-□-2]	Axis 1 Arm 1	250	400	±120°	±0.010	6283mm/s (Composite speed)	0.49	2	10	108	152	0.06	3.3
	Axis 2 Arm 2	250	200	±145°									
	Axis 3 Vertical axis	—	200	200mm [300mm]	±0.010	1393mm/s							
	Axis 4 Rotating axis	—	100	±360°	±0.005	1200°/s							

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P. 10).

Common Specifications

Encode type	Absolute	Ambient temperature/humidity	Temperature: 0-40°C, humidity: 20-85%RH or below (non-condensing)
User wiring	23-conductor AWG26 waterproof connector with shield	Robot weight	32.5kg
User tubing	Air tube (O.D. ø6, I.D. ø4) x 2 (Normal working pressure 0.8MPa) Air tube (O.D. ø4, I.D. ø2.5) x 2 (Normal working pressure 0.8MPa)	Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)	Protection grade (Note 9)	IP65 or equivalent
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)	Air purge pressure (Note 10)	0.3MPa or above (0.6MPa maximum) (Clean, dry air)

Dimensions

*1: The external force applied to each spacer must not exceed 30 N in the axial direction or 2 N·m in the rotating direction.
 *2: To use the LED, the user must provide a circuit that takes signals from the controller's I/O output and supplies 24 VDC to the applicable LED terminal in the user connector.
 *3: The prepared hole 3-M4, depth 8 passes through the side panel of the arm. A long mounting screw will contact the mechanical parts inside the arm, so exercise caution. Be sure to seal the screw by attaching sealing tape, etc.

Applicable Controller Specifications

Applicable controller	Features	Maximum I/O points (inputs/outputs)	Serial communication unit	Power-supply voltage	Page
XSEL-KX	General-purpose type offering excellent expandability	176/160 points	Can be installed.	AC200V	P37

Refer to P. 6 for the explanations of (Note 1) to (Note 10).

IX-NNW70

IX Large SCARA Robot Dustproof/splash-proof type:
Arm Length 700mm, Vertical (Z) Axis 200mm (400mm)

Type Dustproof/splash-proof type Arm length 700mm Load capacity 5kg rated/20kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage
(Example) IX - NNW7020 - 5L - KX - N - EEE - 2 - 2

* Refer to P. 10 for details on the model items.

* The above model code represents a combination of robot and controller.

Model/Specifications

Model	Axis configuration	Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load	
								Rated	Maximum	Push action (Note 4)	Maximum thrust (Note 4)	Allowable inertial moment (kg·m ²) (Note 5)	Allowable torque (N·m)
IX-NNW7020-5L-KX-□-□-□-2 [IX-NNW7040-5L-KX-□-□-□-2]	Axis 1 Arm 1	350	750	±125°	±0.015 (XY)	6597mm/s (Composite speed)	0.52	5	20	188	265	0.1	6.7
	Axis 2 Arm 2	350	400	±145°									
	Axis 3 Vertical axis	—	400	200mm [400mm]	±0.010	1583mm/s							
	Axis 4 Rotating axis	—	200	±360°	±0.005	1200°/s							

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P. 10).

Common Specifications

Encode type	Absolute	Ambient temperature/humidity	Temperature: 0-40°C, humidity: 20-85%RH or below (non-condensing)
User wiring	23-conductor AWG26 waterproof connector with shield	Robot weight	60kg
User tubing	Air tube (O.D. ø4, I.D. ø4) x 2 (Normal working pressure 0.8MPa) Air tube (O.D. ø4, I.D. ø2.5) x 2 (Normal working pressure 0.8MPa)	Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)	Protection grade (Note 9)	IP65 or equivalent
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)	Air purge pressure (Note 10)	0.3MPa or above (0.6MPa maximum) (Clean, dry air)

Dimensions

* The value in square brackets applies when the vertical axis length is 400 mm (optional).

- Note 1: The prepared hole 3-M4, depth 8 connects to the other side of the arm.
- Note 2: The external force applied to each spacer must not exceed 30 N in the axial direction or 2 N·m in the rotating direction.
- Note 3: To use the LED, the user must provide a circuit that takes signals from the controller's I/O output and supplies 24 VDC to the applicable LED terminal in the user connector.
- Note 4: The air inlet can be installed in the reverse direction (by disconnecting the PT3/8 plug and swapping it with the joint).

Applicable Controller Specifications

Applicable controller	Features	Maximum I/O points (inputs/outputs)	Serial communication unit	Power-supply voltage	Page
XSEL-KX	General-purpose type offering excellent expandability	Up to 192 points	Can be installed.	AC200V	P37

Refer to P. 6 for the explanations of (Note 1) to (Note 10).

IX-NNW80

IX Large SCARA Robot Dustproof/splash-proof type:
Arm Length 800mm, Vertical (Z) Axis 200mm (400mm)

Type Dustproof/splash-proof type Arm length 800mm Load capacity 5kg rated/20kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage
(Example) IX-NNW8020-5L-KX-N-EEE-2-2

* Refer to P. 10 for details on the model items.

* The above model code represents a combination of robot and controller.

Model/Specifications

Model	Axis configuration	Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load

IX-HNN7020-5L-KX-□-□-□-2 [IX-HNN7040-5L-KX-□-□-□-2] IX-INN7020-5L-KX-□-□-□-2 [IX-INN7040-5L-KX-□-□-□-2]	Axis 1 Arm 1	350	750	±125°	±0.015 (XY)	6597mm/s (Composite speed)	0.50	5	20	188	265	0.1	6.7
	Axis 2 Arm 2	350	400	±145°									
	Axis 3 Vertical axis	—	400	200mm [400mm]	±0.010	1583mm/s							
	Axis 4 Rotating axis	—	100	±360°	±0.005	1200°/s							

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P. 10).

Common Specifications

Encode type	Absolute	Ambient temperature/humidity	Temperature: 0-40°C, humidity: 20-85%RH or below (non-condensing)
User wiring	25-conductor AWG26 D-sub/25-pin connector with shield (socket)	Robot weight	58kg
User tubing	Air tube (O.D. ø6, I.D. ø4) x 2 (Normal working pressure 0.8MPa) Air tube (O.D. ø4, I.D. ø2.5) x 2 (Normal working pressure 0.8MPa)	Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)		
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)		

Dimensions

* The following illustrations also apply to the inverse type. The only difference is that the robot is installed upside down. (Refer to P. 2.)

* The value in square brackets applies when the vertical axis length is 400 mm (optional).

Note 1: The prepared hole 3-M4, depth 8 connects to the other side of the arm.

Note 2: The external force applied to each spacer must not exceed 30 N in the axial direction or 2 N/m in the rotating direction.

Note 3: To use the LED, the user must provide a circuit that takes signals from the controller's I/O output and supplies 24 VDC to the applicable LED terminal in the user connector.

Applicable Controller Specifications

Applicable controller	Features	Maximum I/O points (inputs/outputs)	Serial communication unit	Power-supply voltage	Page
XSEL-KX	General-purpose type offering excellent expandability	Up to 192 points	Can be installed.	AC200V	P37

Refer to P. 6 for the explanations of (Note 1) to (Note 8).

IX-NNC60

IX Medium SCARA Robot Clean Room Type:
Arm Length 600mm, Vertical (Z) Axis 200mm (300mm)

Type Clean Room type

Arm length 600mm

Load capacity 5kg rated/20kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage

(Example) IX-NNC6020-5L-KX-N1-EEE-2-2

* Refer to P.10 for details on the model items.

* The above model code represents a combination of robot and controller.

Model/Specifications

Model	Axis configuration		Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load	
	Axis 1	Axis 2							Rated	Maximum	Push action (Note 4)	Maximum thrust (Note 4)	Allowable inertial moment (kg·m ²) (Note 5)	Allowable torque (N·m)
IX-NNC6020-5L-KX-□-□-□-2 [IX-NNN6030-5L-KX-□-□-□-2]	Axis 1	Arm 1	350	400	±120°	±0.010	7121mm/s (Composite speed)	0.54	2	10	108	152	0.06	3.3
	Axis 2	Arm 2	250	200	±145°									
	Axis 3	Vertical axis	—	200	200mm [300mm]	±0.010	1393mm/s							
	Axis 4	Rotating axis	—	100	±360°	±0.005	1200°/s							

* In the above model code, specify the desired controller in □. For details, refer to "Explanation of SCARA Robot Model Items" (P.10).

* The value in square brackets applies when the vertical axis length is 300 mm. Other specifications apply commonly to both the vertical axis lengths of 200 mm and 300 mm.

Common Specifications

Encode type	Absolute	Vacuum joint	Applicable tube O.D. ø12
User wiring	25-conductor AWG26 D-sub/25-pin connector with shield (socket)	Suction rate (Note 11)	60NI/min
User tubing	Air tube (O.D. ø6, I.D. ø4) x 2 (Normal working pressure 0.8MPa) Air tube (O.D. ø4, I.D. ø2.5) x 2 (Normal working pressure 0.8MPa)	Cleanliness class	Conforming to class 10 (0.1µm)
Alarm indicator (Note 6)	Red, small LED indicator x 1 (24 VDC must be supplied.)	Ambient temperature/humidity	Temperature: 0-40°C, humidity: 20-85%RH or below (non-condensing)
Brake-release switch (Note 7)	Brake-release switch to prevent the vertical axis from dropping (24 VDC must be supplied.)	Robot weight	32.5kg
		Cable length (Note 8)	5L: 5m (standard), 10L: 10m (optional)

Dimensions

*1: The prepared hole 3-M4, depth 8 passes through the side panel of the arm.

*2: The external force applied to each spacer must not exceed 30 N in the axial direction or 2 N·m in the rotating direction.

*3: To use the LED, the user must provide a circuit that takes signals from the controller's I/O output and supplies 24 VDC to the applicable LED terminal in the user connector.

Cables/tubes

- Motor/encoder cable 5m/10m
- Brake power cable 5m/10m
- User cable 5m/10m
- Air tube (4 pcs) 0.15m

Applicable Controller Specifications

Applicable controller	Features	Maximum I/O points (inputs/outputs)	Serial communication unit	Power-supply voltage	Page
XSEL-KX	General-purpose type offering excellent expandability	176/160 points	Can be installed.	AC200V	P37

Refer to P.6 for the explanations of (Note 1) to (Note 11).

IX-NNC70

IX Large SCARA Robot Clean Room Type:
Arm Length 700mm, Vertical (Z) Axis 200mm (400mm)

Type Clean Room type Arm length 700mm Load capacity 5kg rated/20kg maximum

Model items Series Model Cable length Controller type Standard I/O Expansion I/O I/O cable length Power-supply voltage
(Example) IX - NNC7020 - 5L - KX - N1 - EEE - 2 - 2

* In the above model code, specify the desired controller in o. For details, refer to the explanation on controller (P. 10).

Model/Specifications

Model	Axis configuration	Arm length (mm)	Motor capacity (W)	Work envelope	Positioning repeatability (mm) (Note 1)	Maximum operating speed (Note 2)	Standard cycle time (sec) (Note 3)	Load capacity (kg)		Axis 3 push force (N)		Axis 4 allowable load

XSEL-JX/KX Dedicated IX Controller

Operating mode	Program operation
Number of storable programs	64 programs (6000 steps)
Number of storable positions	3000 positions
Power-supply voltage	

1 Features

The JX/KX controller is a high-performance X-SEL controller customized exclusively for use with the IX Series. It combines the useful functions of the X-SEL controller with the dedicated IX Series commands to achieve a substantial improvement in utility.

1 Super SEL Language

The JX/KX controller adopts Super SEL Language, the same language used for our single-axis/Cartesian robots. Therefore, you can create programs just as easily as you do for your existing IAI controllers. If you are new to an IAI controller, the simple language structure will let you learn the necessary programming steps in no time.

2 Network Ready

The JX/KX controller supports DeviceNet (*1), CC-Link (*2), ProfiBus (*3), and Ethernet.

*1 DeviceNet is a registered trademark of ODVA.

*2 CC-Link is a registered trademark of Mitsubishi Electric Corporation.

*3 ProfiBus is a registered trademark of Siemens AG.

3 Multitasking

A maximum of 16 programs can be run at the same time, so you can transmit signals during operation or control a peripheral simultaneously.

4 Compact

The JX/KX controller is significantly smaller than the conventional M-SEL-IH controller.

2 Model

XSEL - KX - NNN5020 - N1 - EEE - 2 - 2

		NNC2515~8040 (Clean Room Type)	ET [Ethernet] data communication board	SB (Note 4) [Expansion SIO] type B	SB (Note 4) [Expansion SIO] type B	SB (Note 4) [Expansion SIO] type B	SB (Note 4) [Expansion SIO] type B	SB (Note 4) [Expansion SIO] type B	SB (Note 4) [Expansion SIO] type B	SB (Note 4) [Expansion SIO] type B			SB (Note 4) [Expansion SIO] type B
					SC (Note 4) [Expansion SIO] type C	SC (Note 4) [Expansion SIO] type C	SC (Note 4) [Expansion SIO] type C	SC (Note 4) [Expansion SIO] type C	SC (Note 4) [Expansion SIO] type C	SC (Note 4) [Expansion SIO] type C			SC (Note 4) [Expansion SIO] type C

(Note 1) Use a three-digit code (EEE) to specify the expansion slot type. In the case of the JX controller having only one expansion slot, specify the slot (slot 2) using the leftmost digit and leave iEi in the remaining two digits (e.g., N1EE).
 (Note 2) An I/O flat cable is supplied with each standard I/O board, expansion I/O board (50-conductor type) or multipoint I/O board (100-conductor type). The standard cable for standard/ expansion I/O board is 2 m long, but you can also specify 3 m or 5 m. A cable of any length up to 10 m can be fabricated, but a length other than 2, 3 or 5 m will require a special order. If you require a length other than 2, 3 or 5 m, select i0 (None) and place a separate order by specifying the I/O cable model. If you have selected a board other than standard, expansion or multipoint I/O board, select i0i for the I/O flat cable length.
 (Note 3) This is a dedicated option for the JX controller. Use an expansion N3/P3 board for the KX controller.
 (Note 4) This is a dedicated option for the KX controller. C, N3, P3, SA, SB and SC cannot be specified for the JX controller.

3 I/O Wiring Diagrams

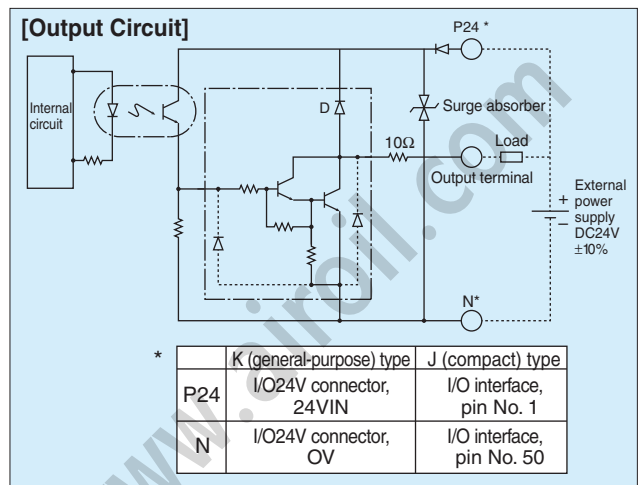

Input Part External input specifications (NPN specification)

Item	Specification
Input power supply	DC24V ±10%
Input current	7mA/point
On/off voltage	On voltage --- 16.0VDC minimum, Off voltage --- 5.0VDC maximum
Insulation method	Photocoupler insulation
External devices	(1) No-voltage contact (with a minimum load of approx. 5VDC/1mA) (2) Photoelectric/proximity sensor (NPN type) (3) Sequencer transistor output (open-collector type) (4) Sequencer contact output (with a minimum load of approx. 5VDC/1mA)

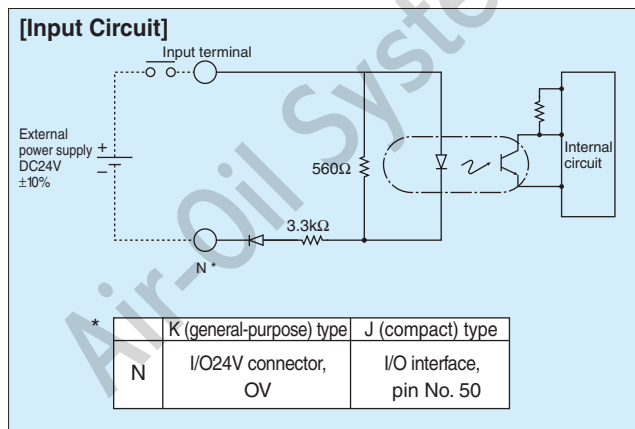

Output Part External output specifications (NPN specification)

Item	Specification
Load voltage	DC24V
Maximum load current	100mA/point, 400mA peak (total current)
Leak current	0.1mA/point maximum
Insulation method	Photocoupler insulation
External devices	(1) Miniature relay, (2) Sequencer input unit

Input Part External input specifications (PNP specification)

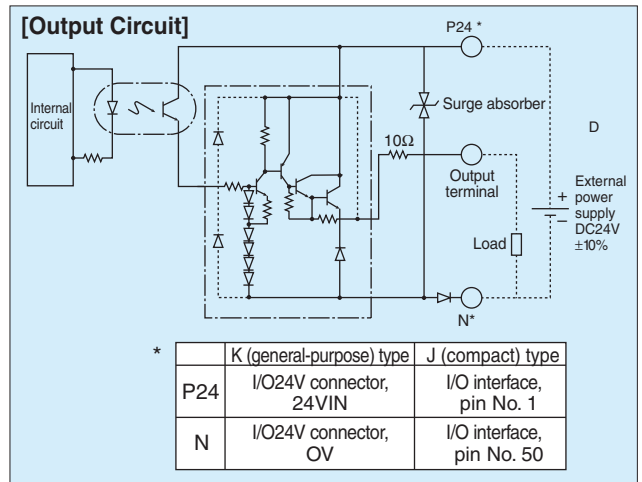

Item	Specification
Input power supply	DC24V ±10%
Input current	7mA/point
On/off voltage	On voltage --- 19.0VDC minimum, Off voltage --- 8.0VDC maximum
Insulation method	Photocoupler insulation
External devices	(1) No-voltage contact (with a minimum load of approx. 5VDC/1mA) (2) Photoelectric/proximity sensor (PNP type) (3) Sequencer transistor output (open-collector type) (4) Sequencer contact output (with a minimum load of approx. 5VDC/1mA)

Output Part External output specifications (PNP specification)

Item	Specification
Load voltage	DC24V
Maximum load current	100mA/point, 400mA/8ports
Leak current	0.1mA/point maximum
Insulation method	Photocoupler insulation
External devices	(1) Miniature relay, (2) Sequencer input unit

Note) The maximum total load current for every eight ports from output port No. 300 is limited to 400 mA. (The total maximum load current for output port No. 300 + n to No. 300 + n + 7 becomes 400 mA, where n is 0 or a multiple of 8.)

5 Specifications

Item	Description	
Controller series/type	JX	KX
Number of controlled axes	4 axes	
Maximum connection axis output (W)	MAX450W	MAX1750W
Weight	5.0kg	7.0kg
Power-supply voltage	Single-phase 200 – 230VAC (factory setting)	
Operating voltage range	±10%	
Power frequency	50/60Hz	
Power capacity	MAX1750VA	MAX3050VA
Operating temperature range	0° – 40°C	
Operating humidity range	30% – 85%	
Storage temperature range	-10° – 65°C	
Axis control method	AC full-digital servo	
Position detection method	17-bit incremental encoder (wire-saving type)	
Programming language	Super SEL Language	
Program steps	6000 steps (total)	
Number of positions	3000 positions (total)	
Number of programs	64 programs	
Multitasking	16 programs	
Storage device	Flash ROM + SRAM battery backup	
Data input method	Teaching pendant or PC software	
Standard inputs	32 points (total of dedicated inputs + general-purpose inputs)	
Standard outputs	16 points (total of dedicated outputs + general-purpose outputs)	
Expansion inputs/outputs	Expandable to a maximum of 144 input/output points in total using an expansion PIO board(s)	Expandable to a maximum of 336 input/output points in total using an expansion PIO board(s)
Serial communication	Not possible	Possible if an expansion SIO board is used (optional)
Other inputs/outputs	Emergency stop input, safety gate input, system ready output	
Protection functions	Motor overcurrent, overload, motor driver temperature check, overload check, encoder open-circuit detection, soft limit over, system error, battery error	
Accessory	I/O flat cable	
Options	Teaching pendant, PC software, expansion I/O board, expansion SIO board	

6 External Dimensions

Controller
JX

Controller
KX

7 Name of Each Part

JX Type (Compact)

KX Type (General-purpose)

1 FG terminal

This terminal connects to FG of the enclosure. The enclosure is connected to PE in the AC input part via wiring inside the controller.

2 Fuse holder (KX type only)

It holds the half-cut fuse for overcurrent protection of the AC input part.

3 Main power input connector

A single-phase 200-VAC input connector (Supplied with a cable-end plug. Refer to the opposite page.)

4 Motor cable connector

It connects the actuator's motor power cable.

5 Axis driver status LEDs

These LEDs are used to monitor the status of the driver CPU controlling the motor drive. The three LEDs specified below are available:

Name	Color	Meaning when the LED is lit
ALM	Orange	An error is detected in the driver.
SVON	Green	The motor is driven with the servo turned on.
BATT ALM	Orange	The absolute battery voltage is low.

6 Encoder cable connector

This 15-pin/D-sub connector connects the actuator's encoder cable.

7 System I/O connector

This connector connects two control inputs relating to controller operation and one system status output. (Supplied with a cable-end plug. Refer to the opposite page.)

Name		
EMG	Emergency stop input	Operation is enabled if this input is ON. If the input is turned OFF, an emergency stop will be actuated.
ENB	Safety gate input	Operation is enabled if this input is ON. If the input is turned OFF, the servo will turn off.
RDY	System ready relay output	The status of the controller is output. Cascade connection is supported. The system is ready if this output is shorted, and not ready if it is open.

8 I/O24V power connector (KX type only)

13 14 This connector supplies insulated I/O power externally when DI/DOs are installed in any I/O slot (12 or 13). (Supplied with a cable-end plug. Refer to the opposite page.)

9 Panel window

This panel provides the four-digit, seven-segment LED display showing the system status, as well as five LED lamps.

10 Mode switch

This alternate switch with lock is used to specify the controller operation mode. To operate the switch, pull it forward and tilt. Tilt the switch upward to select the MANU (manual operation) mode or downward to select the AUTO (automatic operation) mode. Teaching operation can only be performed in the MANU mode. In the MANU mode, automatic operation using external I/Os is not permitted.

11 Teaching connector

This D-sub/25-pin connector is used to connect a teaching pendant or PC to input program positions.

12 Standard I/O slot (Slot 1)

A standard PIO board with 32 input points and 16 output points is installed in the standard specification.

13 Expansion I/O slots (Slots 2, 3 and 4)

An expansion I/O board can be installed in any of these slots (optional).

Main Power Input Connector

This connector is used to connect 100/200 VAC power.
(The cable is provided by the user.)

Wiring diagram

Signal	No.
N	1
L	2
PE	3

System I/O Connector

This connector is used to supply emergency stop, enable and system ready contacts from the controller to a PLC, etc.
(The cable is provided by the user.)

8 Options

Teaching Pendant

Model IA-T-X (Standard)
IA-T-XD (With deadman switch)

Dimensions

Features This teaching device provides functions for program/position input, test operation, monitoring, and so on. The interactive design ensures easy operation for anyone. The deadman switch specification offering added safety is also available.

Specifications

Item	Specification
Operating temperature / humidity Temperature:	0~40°C, humidity: 85%RH or below
Operating environment	Not subject to corrosive gases or significant dust.
Weight	Approx. 650g
Cable length	4m
Display	20 characters x 4 lines, LCD

Note
A product older than Ver. 1.08 cannot be used with a SCARA robot.

ANSI/CE-Compliant Teaching Pendant (Used exclusively with the general-purpose controller)

Model IA-T-XA

Dimensions

Features This teaching device with three position enable switches conforms to the ANSI and CE mark standards. The large LCD screen and interactive navigation allow even a beginner to teach the robot easily and safely.

Specifications

Item	Specification
Operating temperature / humidity Temperature:	0~40°C, humidity: 30~85%RH (non-condensing)
Protective structure	IP54 (excluding cable connectors)
Weight	600g or less (excluding cables)
Cable length	5m
Display	32 characters x 8 lines, LCD

PC Software (Windows type only)

Model IA-101-X-MW (DOS/V version)
IA-101-X-CW (PC98 version)

Note
A product older than Ver. 2.0.0.0 cannot be used with a SCARA robot.

Features This startup assistance software provides functions for program/position input, test operation and monitoring. It significantly enhances the debugging functions to help reduce the startup time.

Description

- Software (floppy disk)
- (The software runs on Windows 95, 98, NT, 2000 and ME.)
- PC connection cable 5m + Emergency stop box (Model CB-ST-E1MW050-EB)

Dimensions

PC connection cable (Model CB-ST-E1MW050)

Note

If you are ordering a PC connection cable separately for maintenance purpose, specify CB-ST-E1MW050. If you are ordering a PC cable and an emergency stop box as a set, specify CB-ST-E1MW050-EB.

Expansion PIO Board

Description This optional board is used to add I/Os (inputs/outputs).
 With the general-purpose controller, a maximum of three expansion PIO boards can be installed in the expansion slots.
 (With the 3/4-axis type compact controller, one expansion PIO board can be installed in the expansion slot.)

Description	Expansion I/O board model	Order model (controller model)	Expansion I/O board slot	Total I/Os (standard + expansion)
32 input points / 16 output points NPN specification	IA-103-X-32	XSEL-JX-3 (4) -□-□-□-□-□-□-□-□-□-□	Expansion slot 1	64 input points / 32 output points

		XSEL-KX-□-□-□-□-□-□-□-□-□-□	Expansion slots 1, 2, 3	80 input points / 112 output points

Expansion SIO Board (Used exclusively with the general-purpose controller)

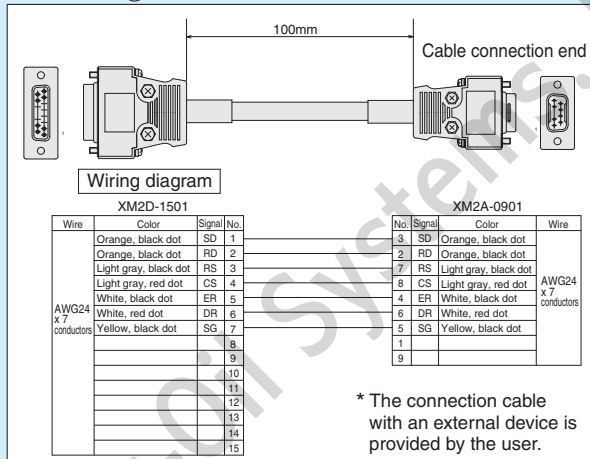

Description This board is used to establish serial communication with external devices.
 It has two channel ports and supports one of three communication formats using the supplied joint cable.

Specifications IA-105-X-MW-A (SIO board + joint cable ① x 2)
 IA-105-X-MW-B (SIO board + joint cable ② x 1)
 IA-105-X-MW-C (SIO board + joint cable ② x 1)

Communication format	Expansion SIO board model	Order model (controller model)	Network board slot	Remarks
RS232C	IA-105-X-MW-A	XSEL-KX-□-□-□-□-□-□-□-□-□-□	Expansion slot 1	A maximum of three boards can be installed (Note 1).
RS422	IA-105-X-MW-B	XSEL-KX-□-□-□-□-□-□-□-□-□-□	Expansion slot 1	
RS485	IA-105-X-MW-C	XSEL-KX-□-□-□-□-□-□-□-□-□-□	Expansion slot 1	

(Note 1) The current capacity may not be enough depending on how many expansion boards are used in addition to the standard board.
 If you want to install three boards, consult IAI beforehand.

Joint cable ① Model: CB-ST-232J001

Joint cable ② Model: CB-ST-422J010

Network Board

Description This communication board is used for connection to a field network.

Description	Expansion I/O board model	Order model (controller model)	Expansion I/O board slot	Total I/Os (standard + expansion)
DeviceNet	IA-NT-3206-DV	XSEL-JX-□-□-□-□-□-□-□-□-□-□	Standard slot	256 input points / 256 output points

■ Multipoint I/O Board & Terminal Block

These board and terminal block are used in cases where the controller requires many PIO points.

System Configuration

Multipoint I/O Board

Description The half-pitch connector provides 48 input points and 48 output points with a single I/O board. The supplied half-pitch flat cable is difficult to connect due to its thin lead wires, so use a dedicated terminal block for connection to an external device.

Description	Multipoint I/O board model	Order model (controller model)	Multipoint I/O board slot	Total I/Os
48 input points / 48 output points (NPN specification)	IA-IO-3205-NP	XSEL-JX-□-□-N3-EEE-□-□	Standard slot	48 input points / 48 output points
48 input points / 48 output points (PNP specification)	IA-IO-3205-PN	XSEL-JX□-□-P3-EEE-□-□	Standard slot	48 input points / 48 output points

		XSEL-KX-□-□-N1-N3N3N3-□-2	Expansion slots 1, 2, 3	176 input points / 160 output points
48 input points / 48 output points (PNP specification)	IA-IO-3204-PN	XSEL-KX-□-□-P1-P3EE-□-2	Expansion slot 1	80 input points / 64 output points
		XSEL-KX-□-□-P1-P3P3E-□-2	Expansion slot 1, 2	128 input points / 112 output points
		XSEL-KX-□-□-P1-P3P3P3-□-2	Expansion slots 1, 2, 3	176 input points / 160 output points

<Dedicated Terminal for Multipoint I/O Board>

Used exclusively with the KX controller

Model **TU-MA96** (NPN specification)
TU-MA96-P (PNP specification)

Description This terminal block is used to wire a multipoint I/O board. It not only simplifies the wiring task but also provides the following functions:
 1. The transistor buffer circuit ensures an output of 500 mA per point (0.8 A per eight points).
 2. The power circuit can be divided into six input systems (each consisting of eight inputs) and six output systems (each consisting of eight outputs).
 3. LEDs are provided for checking the power status of output signal circuit.
 Total six LEDs are provided, one for each of the six output systems (each consisting of eight outputs). Each LED will turn off when the corresponding power input is cut off or the applicable fuse on the board is blown.

Note If you are using this terminal block, be sure to connect a multipoint I/O board of NPN specification. The connection between the controller and terminal block must be an NPN connection. The connection between the terminal block and user controller will be PNP. (NPN is already selected in the terminal block, so a PNP board cannot be connected.) This terminal block is designed exclusively for use with the KX controller. (It cannot be used with the JX controller.)

Connector Assignments of Dedicated Terminal Block for Multipoint I/O Board

This connector is used to connect an external I/O device. Each connector accepts 16 DIs and 16 DOs.

External I/O Connector Specifications
