

**The last time liquid and air mixed
this well, they invented champagne.**

Life sciences professionals are quietly celebrating the merger that created ASCO Numatics. Because it now takes just one call to access the world's most comprehensive range of unified fluid automation solutions. That includes more than 50,000 highly reliable fluid control valves, plus an extensive selection of air preparation equipment for fluid power. And it's all backed up by focused process expertise and consistent local support.

So ASCO Numatics brings lower cost of ownership, greater asset availability, and improved productivity to the party.
