- About V-SFT-5

V8 concept

1. High Performance
2. Connectivity
3. Usability

High Performance

**Outstanding
Visibility**

Color Models
All models support
65,535 colors!!

Monochrome display
256 grayscale
Suitable for image
processing.

Video
30fps video display
with 1.6 million colors
* 30fps is the same as TV!

Connectivity

Enhanced Connectivity

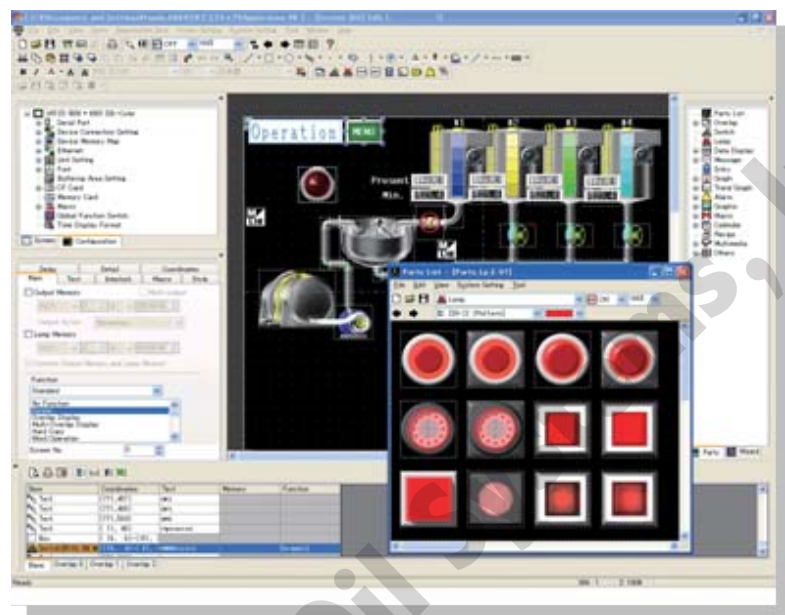

- **8WAY communication**
Up to 8 protocols running simultaneously.
- **Dual IP addressing**
First-in-industry V8 works as a gateway between 2 network!
- **2 USB ports**
USB (master/slave) ports are included as standard equipment.

Usability

Simple & Speedy configuration

- **Improved V-SFT-5**
Many useful function to speed up development time.

- **Component Parts**
The fastest and easiest way to configure screens.

- **Emulator**
You can debug your screen program on your PC without any hardware!

Screen configuration software

V-SFT-5 (Ver.5)

Windows98/Me/NT Ver4.0/2000/
XP/XP 64 Edition/Vista 32bit

Optional units

GU-00/01/02/03/10/11

Optional unit for Video/RGB/Sound.

00	Video + Sound	10	Video 2CH + RGB-IN
01	RGB-IN + Sound	11	RGB-IN 2CH
02	RGB-OUT + Sound		
03	Sound		

Communication unit

CU-xx

Communication units for field network.

00	OPCN-1 *	04	PROFIBUS
01	T-LINK	06	SX-BUS
02	CC-Link *	07	DeviceNet*
03-3	Ethernet *	08	FL-net*

*Under development

DU-10

(for V806 series)

D-Sub9pin/CF socket

Optional items

TC-D9

Connects V8 with other units via
RS422/485 terminal.

V-I/O

External serial I/O unit with cable to
connect to V8. 16IN/16OUT.

D9-D25

Dsub9-Dsub25 conversion cable to
utilize comm cable of
previous models.

CREC

Memory card recorder

V8xx-GS/V8xx-GSN10

Protective sheets for each size.
GSN10 is anti-glare type.
5 sheets per set.

V7-BT

Lithium battery for V8 series.

V8 Key Features

- Component Parts
- 8Way Communication
- Pop-up Alert (message box)
- Conditional Visibility
- Dual IP Address
- MES Interface
- FTP Server
- Dual CF Card Interface
- USB Keyboards
- USB Mouse
- PictBridge Printers

Component Parts

First-ever
In industry!

Problem

"I want to log the alarms".
"I want to use password for protection"
"I want to connect external devices"

I know what I want to achieve, but
SCREEN CONFIGURATION IS TOO COMPLICATED BECAUSE OF SO MANY SETTINGS!

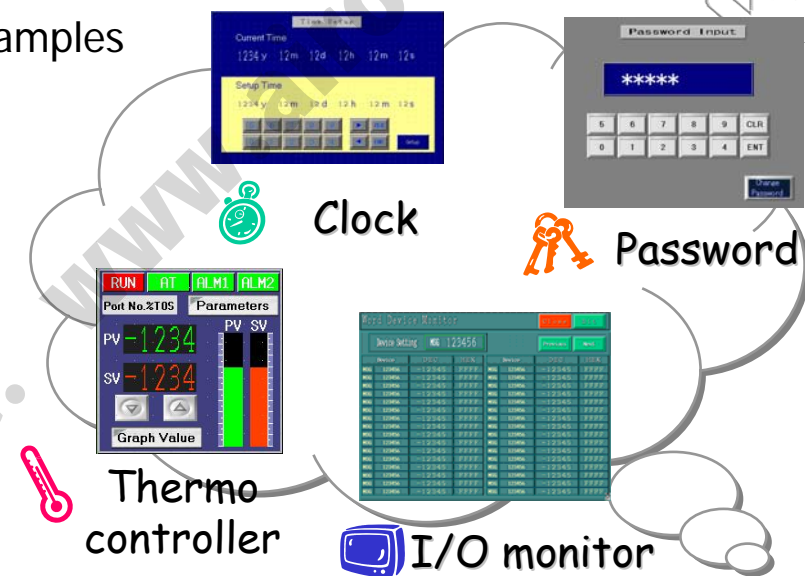

Solution

COMPONENT PARTS

Combinations of the functions and necessary parts which are frequently used is prepared as all-in-one "Component Part".
You can achieve complicated features just like placing a single part on a screen.

Examples

Simply
Select & Place

8way Communication

Problem

I want to control several external devices with one V8 panel.

But Hakko's "dual driver" is not enough!

I can connect only PLC and thermo controller/inverter at the same time...

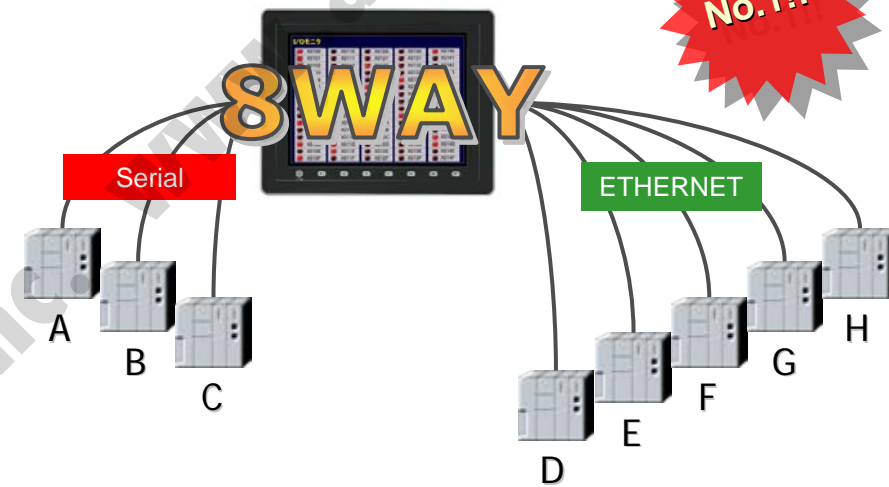

Solution

8WAY COMMUNICATION

Up to 8 different protocols run at the same time, including PLCs, thermo controllers, inverters, and more!

8WAY Communication image

Serial (3 protocols)
+ ETHERNET (5 protocols)

8WAY (8 protocols)

Pop-up Alert (message box)

Problem

To avoid possible misoperation, I can achieve by

- Prompting a dialog box to proceed or cancel
- Controlling buttons by interlocking the input by PLC program.

BUT I DO NOT HAVE TIME!

That's a bother...

Solution

MESSAGE BOX

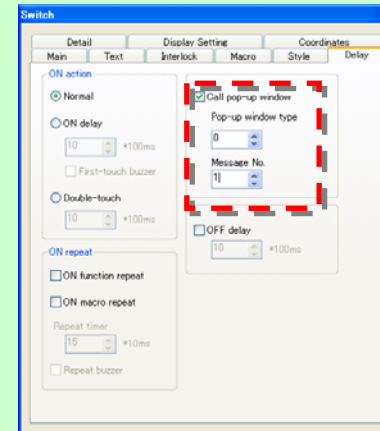

In the Switch setting dialog, simply check a checkbox to add message box feature and register your desired messages. No macro or no overlap settings!!

How to create a message box

Step 1:
Create messages.

Step 2:
Switch setting dialog

First-ever
In industry

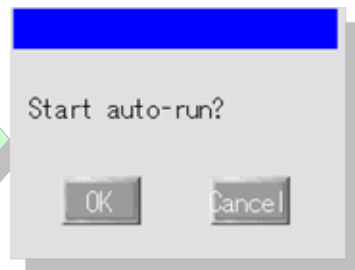

Image of
"Message box"

Easy!!

Conditional Visibility

Problem

I always make several screen programs which have slight differences, depending on the machines

If possible, I DO NOT WANT TO HAVE DIFFERENT SCREEN PROGRAMS BECAUSE IT MAKES DIFFICULT TO MAINTAIN THEM!

Solution

CONDITIONAL VISIBILITY

You can show/hide the items such as graphics, data displays, characters, switches, and lamps by the command from PLC. Create only one screen program and control the visibility of the items to meet each machine's requirements.

Example

Screen programs are different each other.

Machine A

Machine B

Machine C

Create one main screen program and...

Control item's visibility by bit control.

Both "static" and "dynamic" visibility control is supported.

Dual IP Address

Problem

I want to have separate network for the office and the factory due to security reason.

I want to exchange the information between office and factory.

Solution

GATEWAY*
between two different network

It is possible to have two different IP addresses.
V8 becomes a gateway between factory and office while having security and reducing the load of the network.

*When using Ethernet unit.

Image of multiple-IP

First-ever
In industry

It is possible to monitor current status of the factory from the office
It is possible to monitor current status of the factory from the office via TELLUS & V-Server

MES Interface

Problem

I want to correct the production data to the PC, but I am not programming expert... Any good solution?

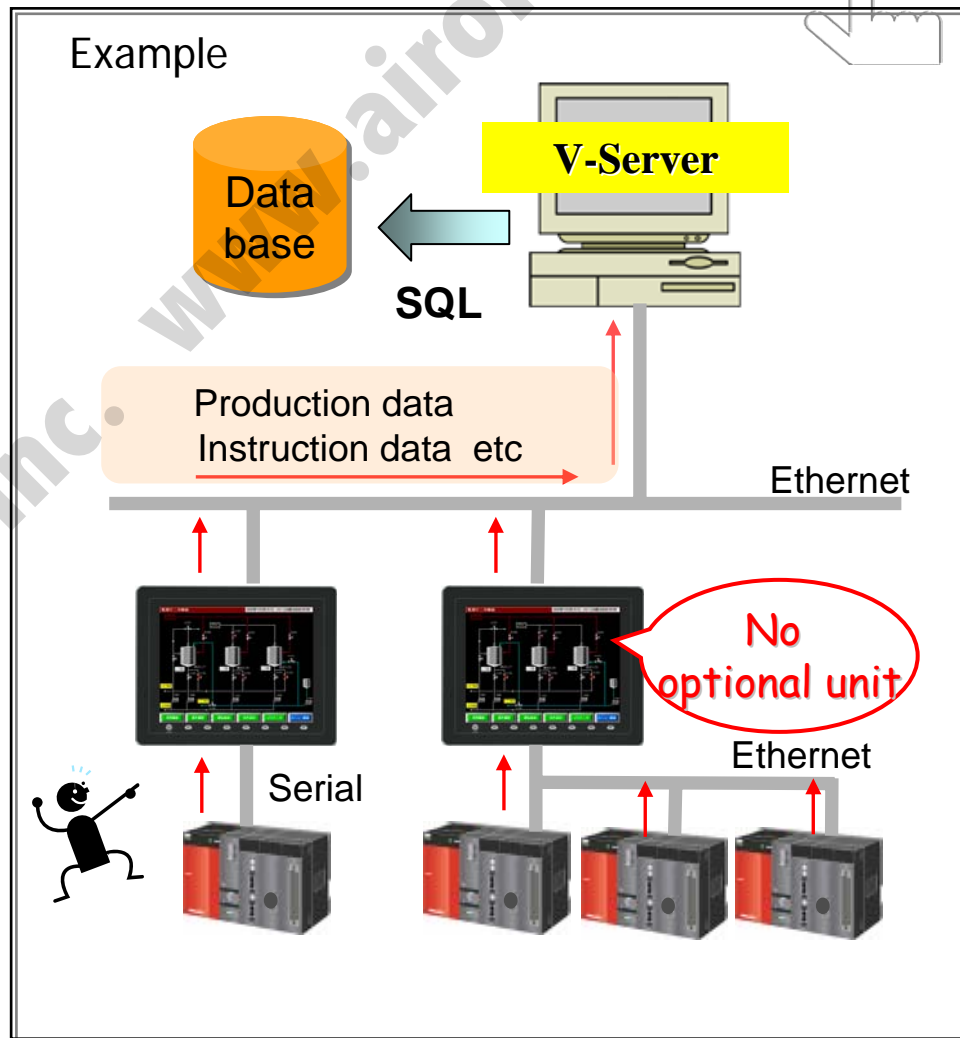

Solution

MES INTERFACE FEATURE

V8 + V-Server helps you!
 No special hardware or dedicated program is required.
 Various information is sent to data base in SQL via V-Server.

*MES = Manufacturing Execution System

Example

FTP Server

Problem

I want to manage production history of a factory from a remote office.

I want to update data of the machine which locates far from here.

But I cannot go there easily!

Solution

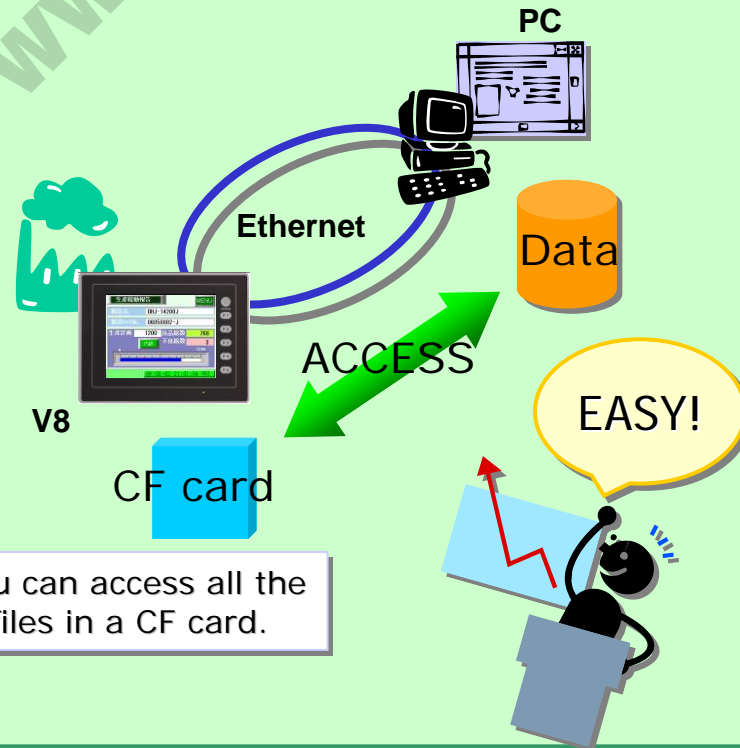

FTP SERVER

It is possible to read/write CF card inserted in V8 from your office. No dedicated program required, you can access data via web browser such as Internet Explorer.

**V-Server not required.*

FTP Server helps you...

You can access to the CF card inserted in V8 From your PC connected to network. No special application program required.

You can access all the files in a CF card.

Dual CF card Interface

Problem

I am using a CF card for recipe and data logging.

BUT I NEED TO OPEN THE MACHINE TO REMOVE THE CARD...

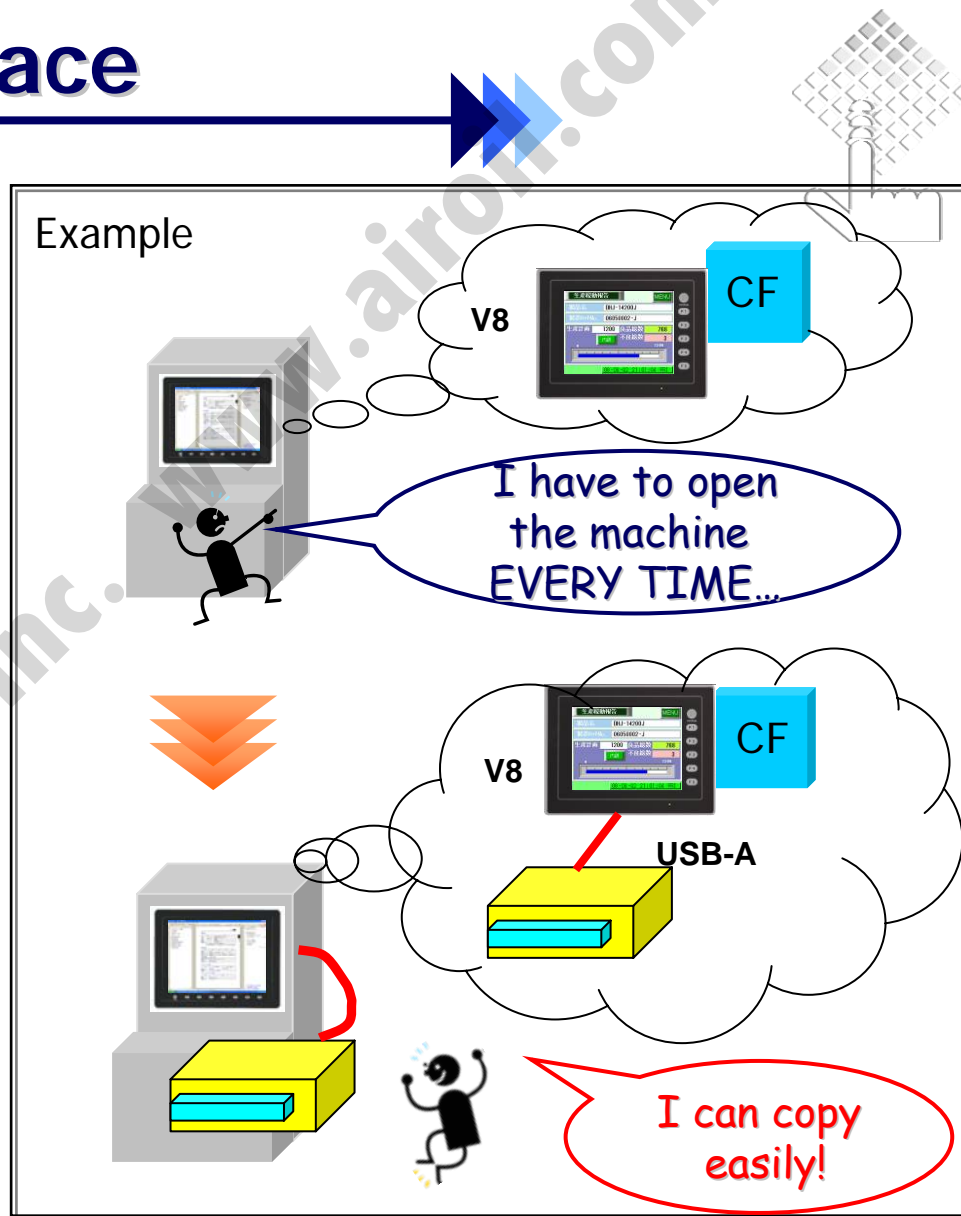

Solution

TWO CF CARD DRIVES

You can use CF card socket on V8 and external CF card reader on USB port simultaneously.
You can copy the data from one to another.
No bothering machine operation!

Example

USB Keyboard

Problem

Software keyboard on the screen is too small to type!

I cannot see the screen at all when displaying keyboard, especially when using small panels.

Solution

USB KEYBOARD SUPPORTED

Entry via USB keyboard is supported. No need to create software keyboard or 10 key on the screen.

Example

I cannot see the screen at all!

How can I operate??

USB KEYBOARD

EASY ENTRY!!!

USB Mouse

Problem

I am displaying PC screen on my touch panel, but it is difficult to control using touch switch...

Solution

USB MOUSE SUPPORTED

In addition to touch switch operation, it is also possible to operate using USB mouse simultaneously.

Example

It is difficult to operate by touching the panel.

I cannot operate PC screen very well...

USB MOUSE

Good! I can operate it just like PC!

A mouse is good tool for Monitouch, too!

PictBridge Printers

Problem

I cannot find any MS-DOS printer nowadays.
Which printer is supported?

It is hard to find right printer because supported models are limited

Solution

PICTBRIDGE-COMPATIBLE PRINTER

In addition to the printers previously supported, new printers which are compatible with PictBridge is also supported!

Example

No Optional unit Required.

Any printers which support PictBridge can be connected to V8 Directly via USB!!

Coming New Lineup is...

- V815X(15")
December 2008
- V808CH (pendant type 8")
January 2009
- Low-cost V8 (5.7", 8")
January 2009

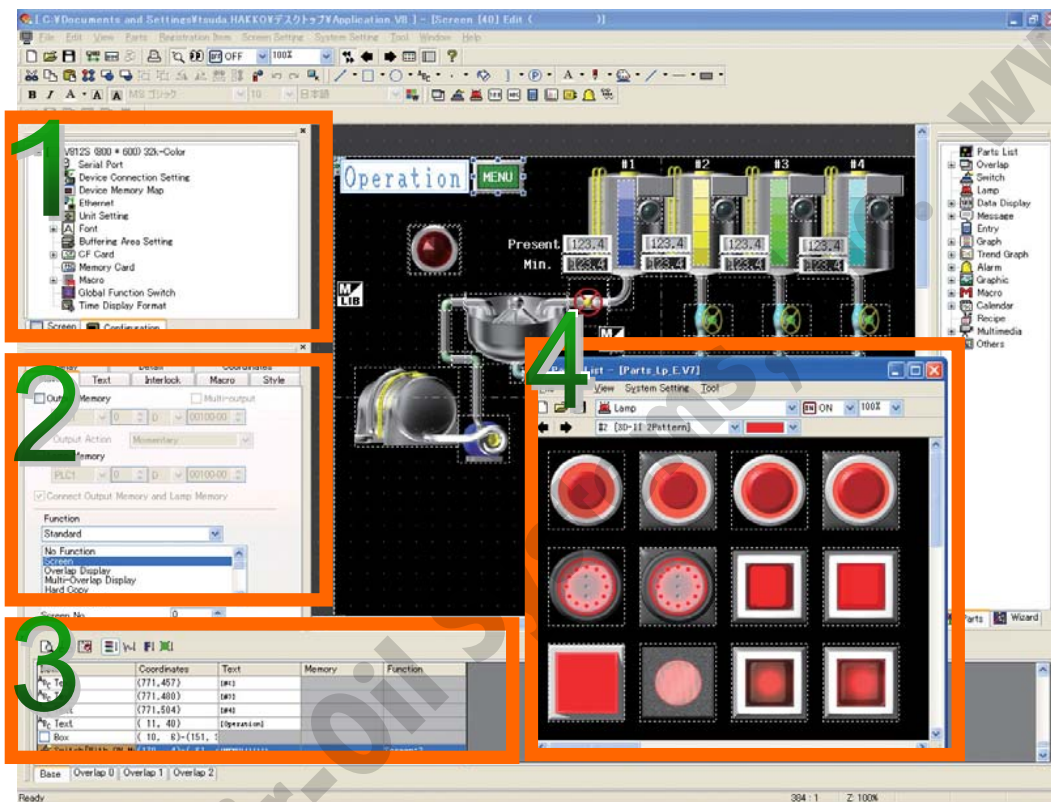

About V-SFT-5

- V-SFT-5
- Built-in Emulator
- Enhanced Object Alignment
- Scalable Screen Program

V-SFT-5

V-SFT-5 is a screen configuration software for V8/V7/V6/V4/TELLUS.

1

Project View

Grasp screen program , settings etc.

2

Item View

Set the functions of the item from this dialog.

3

Item List

You can enter the position, switch text here.

4

Parts List

Drag and drop a part from the selection of more than 1000 kinds of attractive parts.

Built-in Emulator

Problem

I wish I can debug my program only using PC...

I want to capture the screen image to make manuals or documents.

Solution

EMULATOR

It is possible to check the operations while creating program.

You can copy the image on Emulator and paste it to other applications such as Excel or Word. Very convenient to create documents!

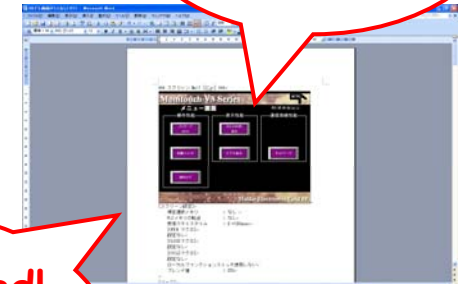

Example

Start the Emulator to test your program on your PC!

Capture the Emulator image and paste it!

Debug completed!
AND
Document completed!

Enhanced object alignment

Problem

It takes time to align and adjust the size of objects...

Solution

STRONG LAYOUT HELPER

UP-Down/Left-Right/Horizontal-Vertical

Equal arrangement/sizing and so on.
It reduces your development time!

Layout menu

Right-click menu

- Group
- Order
- Place
- Arrangement (Equal)
- Put All in Same Size
- Rotation/Reverse Rotation
- Vertex Edit
- Change Part
- Link

- Left End
- Right End
- Top End
- Bottom End
- Vertical Center
- Horizontal Center

- Vertical Align (Regular Spacing)
- Vertical Align (Specified)
- Horizontal Align (Regular Spacing)
- Horizontal Align (Specified)
- Switch/lamp Centering

- Width
- Height
- All

Easy!

First-ever In Industry

Scalable Screen Program

Problem

I want to reuse my project.
But screen size is different.
Do I have to make the program
again from scratch?

Solution

SCALABLE SCREEN

V-SFT-5 will resize the screen program
automatically by selecting desired model
from the list.

Example

640x480

Select
desired
model...

800x600

Easy!!
